

■ Linux Roadmap - 20 Days

A beginner-friendly roadmap by **DevOps with Anu**

Days 1–5

Linux intro, installation, terminal basics, pwd, ls, cd, mkdir, touch.

Days 6–10

Files, directories, permissions, users, groups, package managers.

Days 11–15

Processes, services, networking, SSH, archives, logs.

Days 16–20

Shell scripting, cron jobs, Git basics, system monitoring, mini project.

Daily Tip: Practice at least 30 minutes every day and type every command yourself.

■ **Goal:** Become comfortable with Linux and prepare for DevOps.
